1. COMPANY INTRODUCTION

Company Overview

❖ About Company

Saarthi Apex Private Limited is Operating in 4 Business Models-

1-Contract execution (govt./private projects)

We participate in tenders of contract work, it can be government and private projects.

2-Material supply

We are ready and eligible to supply any type of material for Industry and construction projects.

3-Manpower training & placement

We have developed integrated platform in which we identify unskilled manpower and provide specific training according to industrial and construction project work. So that we could reduce shortage of skilled manpower and unemployment.

4-Manpower Supply

We are providing all type of skilled and Un-skilled manpower for industrial and construction projects work across India.

Founded by **Gaurav Dubey**, the company currently manages **200+ skilled & unskilled manpower's** and supports projects in civil, mechanical (fabrication & erection work), instrumentation, painting and housekeeping services.

Service Area: **PAN India**

“Building Strength, Delivering Excellence.”

❖ INTRODUCTION

Saarthi Apex Private Limited represents a new phase of growth and vision, evolving from our 13-year legacy as SP Instruments. Under SP Instruments, we consistently delivered quality-driven solutions and built a strong foundation of trust while primarily operating as a subcontracting service provider.

Today, as Saarthi Apex Private Limited, we are expanding our capabilities and stepping forward as a comprehensive solutions provider. Our goal is not just to deliver services, but to become a reliable and long-term partner for our clients.

We are committed to offering a wide range of professional services under one roof, with a strong focus on quality, timely execution, and customer satisfaction.

With Saarthi Apex Private Limited, we begin a new journey—where experience, innovation, and trust come together to create lasting value.

❖ VISION

- Become a trusted and respected name in the construction industry
- Deliver strong, durable, and high-quality infrastructure projects
- Set new standards of excellence through innovation and skill
- Build safe, modern, and future-ready structures
- Earn long-term client trust through quality and reliability
- Grow as a leading construction and manpower solutions provider

Building strength. Creating trust. Shaping the future.”

❖ MISSION

- Deliver high-quality construction, civil, and painting services with precision and excellence.
- Provide skilled and reliable manpower to ensure smooth project execution.
- Maintain the highest standards of safety, integrity, and professionalism.
- Complete every project on time with cost-effective solutions.
- Build long-term relationships through trust, transparency, and consistent performance.

11. SAFETY POLICY

- Saarthi Apex Private Limited prioritizes employee well-being by implementing strict safety systems across all project sites.
- Regular inspections and audits are conducted to ensure full compliance with applicable safety regulations and industry standards.

- The company promotes a strong safety culture, encouraging every team member to proactively identify and report potential hazards.
- These robust safety practices help protect people and assets while ensuring smooth and efficient project execution.
- Comprehensive safety measures are implemented at every stage of operations to maintain a secure and controlled work environment.
- All personnel are provided with appropriate Personal Protective Equipment (PPE) to minimize workplace risks and ensure safety compliance.
- Routine site inspections and risk assessments are carried out to prevent incidents and maintain operational safety standards.
- Continuous monitoring and improvement of safety practices enable the organization to maintain a safe, responsible, and productive workplace.

12. OUR INNOVATION

At Saarthi Apex Private Limited, we go beyond traditional manpower supply by implementing a structured and process-driven workforce management system.

Our approach includes:

- Smart manpower allocation based on skill mapping
- Real-time supervision and reporting
- Cost optimization models for clients
- Efficient deployment strategies

This ensures higher productivity, reduced operational cost, and improved project efficiency for our clients.
